

Mohammed Al-homaidi

Front-End Developer | Web & Application with React Native

Saudi Arabia, alhoamidi505@gmail.com • +966556605664

[LinkedIn](#), [Github](#), [portfolio](#)

SUMMARY

Dedicated and continuously evolving Front-End Developer with a strong focus on building modern, user-centered web and mobile applications. Proficient in React.js, Next.js, React Native, and TypeScript, with a deep understanding of performance optimization and clean UI/UX design. Experienced in delivering high-quality, maintainable code for both platforms. Passionate about solving real-world problems through code, I thrive in collaborative, agile teams and remain committed to continuous learning and delivering impactful digital experiences.

PROFESSIONAL EXPERIENCE

MANAHEL

Saudi Arabia

Frontend developer (Web & Mobile)

JAN 2025-Present

- Joined Manahel to maintain and improve an existing charitable platform serving donors and recipients in Makkah. Initially brought in to address urgent issues across both web and mobile interfaces.
- Improved and debugged the legacy CodeIgniter-based web platform and the Ionic-based mobile app, resolving critical bugs and enhancing the overall donation flow and user experience.
- Focused on enhancing frontend code quality and optimizing UX across platforms.
- Currently collaborating with the product and backend teams to analyze and plan a complete platform rebuild. While the new backend is being developed with Laravel, I lead frontend development using React for web and React Native for mobile — shaping a modern, maintainable architecture and improved user journey.

BJDA

Riyadh, Saudi Arabia

Frontend Web Developer

JUNE 2023-2025

- Actively participated in Agile development processes, including sprint planning, backlog grooming, and daily stand-ups, to ensure timely and efficient delivery of features.
- Reviewed product user interface for conformity to design guidelines, ensuring consistency and adherence to the established UI/UX principles.
- Demonstrated strong communication skills by conveying ideas, discussing technical solutions, and addressing challenges within the team and with stakeholders.
- Utilized React and its ecosystem to architect and implement front-end solutions, including state management, hooks, and component lifecycle.
- Developed responsive and pixel-perfect web pages using HTML, CSS, and JavaScript, adhering to design specifications and best practices.

FREELANCER

Saudi Arabia

Frontend developer (Web & Mobile)

JUNE 2022-2023

- Delivered various freelance projects for clients through platforms offering microservices and gig-based work (such as Mostaq, Khamsat, and others).
- Worked on both web and mobile interfaces, applying best practices in frontend development using React, React Native, and modern UI libraries.

- Gained hands-on experience solving real-world problems under client requirements and time constraints.
- Each project served as an opportunity to deepen my technical knowledge, improve communication skills, and explore practical solutions.
- This journey was more than just completing tasks — it was a continuous learning process that shaped the developer I am today.

EDUCATION

Education and Qualifications

Self-taught Developer

Online Learning Platforms (Udemy, Coursera, YouTube, etc.), Riyadh

2022 - Present

Pursued a self-directed learning path after high school, focusing on front-end web and mobile development. Completed multiple online courses in HTML, CSS, JavaScript, React, React Native, and backend fundamentals. Gained real-world experience through freelance projects and full-time positions, proving capability and adaptability in real work environments.

SKILLS

- Next JS
- React JS
- React Native
- State Management (Redux, ContextApi, Pinia and Vuesfor Vue Js)
- JavaScript (ES6+)
- Typescript
- HTML5
- CSS3
- SCSS/SASS
- Bootstrap
- Tailwind Css
- Git
- Github
- Node.js
- Ionic

LANGUAGES

- Arabic - Mother Tongue
- English - Beginner

PROJECTS

- Manahel
 - <https://manahel.net/>
 - This platform was designed to order and distribute products in the Grand Mosque using the following technologies: CodeIgniter, HTML, CSS, JavaScript, jQuery, and Bootstrap.

- BJDA
 - <https://Bjda.com/>
 - Bjda
 - Build and maintained the entirety of the UIs
